U.F.O. STUDY CLUB

October

Issue 3

Kansas City, Missouri

1958

The mailing list has nearly doubled! Over 500 receiving The Space Viewer now! Acquaint friends and neighbors with the purpose of this non-profit organization: Articles of Agreement, Article II, OBJECT: The object of this organization is to assimilate information and to function as a public forum on unidentified flying objects and all that the field embraces.

SUNDAY, OCTOBER 12, 1958, 2:30 p.m., Drexel Hall, Linwood & Baltimore, Kansas City, Mo.

Mr. Otis T. Carr, spaceship designer and inventor of free-energy systems for light and power, OTC Enterprises, Inc., Baltimore, Maryland, will be the speaker for the October meeting of the U.F.O. Study Club!

The introduction alone is terrific, but wait, there's more! A small group of people, your Editor included, had the good fortune to be in the audience of Mr. Carr and Major Wayne S. Aho, Director, Washington Saucer Intelligence, earlier this month here in Kansas City. The gentlemen arrived at 3:00 o'clock in the morning, and in spite of such an unlikely hour, Mr. Carr was bright and voluble for the next two and a half hours about his near future space plans, all of which he will reveal at the public meeting. Included here are a few of the tantalizing highlights.

Mr. Carr has been researching and experimenting for more than twenty years on the principle of free energy and says he has at last tapped the secret and can build a "saucer" which will fly to the Moon. He has set December, 1959, as his date goal for the trip with Major Aho as sole companion passenger. Mr. Carr was asked what he expected to find on the Moon. He replied, "We expect to find bases there established by beings from other worlds." And he facetiously added, "We hope so anyhow. After our two-and-a-half day trip, we'll sure be in a mood for a good hot meal!" Mr. Carr explains why such bases would exist as well as ALL THE INFORMATION HE HAS AVAILABLE as the result of his long labor. HE HOLDS NOTHING SECRET. It is his conviction such information belongs to the people as the only real safety lies in knowing the truth. Further, this is not to be Mr. Carr's first attempt to build a "saucer" type craft. He has already built six test models! Impossible? . . .

Come listen to the man himself! This will be a great day of enlightening information, and as always, the speaker will answer your questions after his talk. Mark your calendars now -- OCTOBER 12.

Donation: Club members, \$1.00, and juniors 25¢ (show Club membership card at the door). Non-members, \$1.50 and juniors, 12-17, 50¢. Club memberships also available at the door. In all cases of speakers appearing before the U.F.O. Study Club and other such clubs across the country, the speakers leave a greater wealth of information than they take with them in financial gain. Their expenses are heavy and often do well to break even on a lecture tour. Freely we give for that which is being abundantly given to us.

#### PAST MEETING, September 7, THE MITCHELL SISTERS

The barometer of audience reception has shown this to be one of the best programs yet presented by the Club! And everyone is delighted with Drexel Hall. The Mitchells gave a detailed account of their contacts with space beings and of Helen's ride in a "saucer" and her adventures aboard a "Meired" or mother craft. So fascinating was their talk and answers to questions posed by the interested crowd that it was difficult to close the session. They presented themselves and their talk with utmost sincerity, and the vast fund of knowledge they have acquired concerning space craft and space people was truly astounding. They also tell us they continue to be in regular communication with their space "contacts". It may be possible to present them again

at a later date, and with later information. Would you like to hear from them further? Certainly, they are always welcome in our town and in our homes. Incidentally, their mail following their talk here was so voluminous that it took their combined full time for the following week to reply to all the thoughtful folks who wrote.

Such reception also created a demand for copies of their talk. In the interest of satisfying this demand, the Club took the initiative to request permission of Betty and Helen to have the talk mimeographed to distribute at the October 12 meeting only. They graciously consented and 200 copies will be available next meeting at 50¢ per copy. The small margin of net compensation after costs will be turned to the girls as a token of gratitude for this privilege. Again, as was the case in asking them to appear here originally, we called them, they did not call us.

For out-of-towners only: If you will be unable to attend this next meeting and desire a copy of the Mitchell's talk, please mail your request and 50¢ in coin or stamps, and self-addressed, stamped envelope to: Paul M. Wheeler, President of the Club, 1117 Truman Road, Independence, Missouri.

Look for Betty and Helen Mitchell's book, "Among the Saucers", to be published soon. Our best wishes for highest success to these gracious ladies.

#### SIGHTINGS

Along with the Mitchell sisters came saucer sightings. They, along with other members of your UFO group, were sharing the favorite summer pastime of your Editor--sitting on the back patio. Betty pointed to a light moving northwest overhead. Everyone saw it and observed it turn north in a wide arc and disappear. Again, neither sound nor vapor trail. Paul and Luella Wheeler and Helen M. saw a green flash over the peak of the house. One other fireball type phenomena was seen in the south. Of course, the popular question is, "What did you have to drink?" Well, believe-it-or-not, Ripley, this is a straight coke and iced tea crowd. This was a combination dinner and meeting to arrange for the Club program and later evening appearance on Lee Vogel's Nite Beat. After the evening's activities were concluded, your Editor and his wife were again back on the patio and observed an object at 2:30 a.m. for some 15 minutes. It glowed bright, then dim, then bright again and remained stationary in the sky. This same area in the sky has been checked and rechecked at the same time other nights and only a few dim stars have been seen on clear nights.

Sunday, September 7, 5:30 p.m. (the afternoon of the Mitchell's talk), Mr. Hayes Walker, Jr., at home with his family observed an object appear and travel very fast over his home and then turn north and disappear. He called the Club later to tell of the experience and said the object was much larger in size than the jet aircraft which pass over his house in the area of the Grandview Air Base. He has not previously attended any Club meetings but has been interested in aerial phenomena, reading extensively, and "watching the sky" for nearly two years. He feels patience is rewarded. He further described the object as being round and silvery and silent, traveling at a tremendous rate of speed... NOTE: The Club has received many such calls from persons not connected with the Club since its inception in February, 1957, and many of the calls have been received after the Club meetings. Coincidence? You tell us. Like you, we are trying to fathom it, too. But it might be well to keep all eyes open!

#### LIBRARY

The Club lending library is progressing with the diligent efforts of its Chairman, Neal Pinkerton. Neal reports some very nice books are coming in, but not quite enough yet to get into business. He receives book donations at meetings, so if you have some to share be sure to bring them. Outside of Club meetings, he will make arrangements to have them picked up. His home phone is Jackson 3-2579, and you can reach him between 7 and 9 in the evening.

LIBRARY (Cont)

Lending policies have been worked out as well as many other details and will be duly published just as soon as the library is ready to operate. The Club is contributing extra choice books along with those being donated by individuals. Folks have been waiting a long time for a ready source of reading material on this subject and with your help and push it will be ready to go very soon.

BOOKS

FLYING SAUCER PILGRIMAGE, Helen and Bryant Reeve. Reeve, a graduate engineer of Yale and Massachusetts Institute of Technology, and his wife, due to conflicting information and official denials, decided to make their own investigation. Amazing private research over two years' time and 23,000 miles of travel.

YOU DO TAKE IT WITH YOU, R. DeWitt Miller. This work is the result of Mr. Miller's 25 years psychical research. As well as taking up the "other side" of life, the author says, "What you think affects you, even what you think of flying saucers."

PERIODICALS

PROCEEDINGS, George Van Tassle, Box 419, Yucca Valley, California. Bi-monthly. Van Tassle has been researching in the "saucer" field for 10 years.

FLYING SAUCERS From Other Worlds, Ray Palmer, Box 36, Rt. 2, Amherst, Wisconsin. Bi-Monthly. Sometimes available on the 12th Street newsstands downtown. It has been stated that Palmer is the world's leading New Age publisher.

COSMIC SCIENCE, George Adamski, Star Route, Valley Center, California. Big answers to the big questions about "saucers".

THE LISTENING POST, Clara John, 4811 Illinois Ave., N.W., Washington, D.C.  
"Comes out when the pot boils over." Chock solid with pointed bits of info.

Repeat:

THE UFO INVESTIGATOR, Major Donald E. Keyhoe, National Investigations Committee on Aerial Phenomena, 1536 Connecticut Ave., Washington 6, D.C. Solid documentary info on UFO's and specialized effort to gain release of officially secret info compiled to date. NICAP, like others in the field, is working against untold hazards, and especially needs our extra support at this time. Help those who are helping us obtain the knowledge we, the people, should have.

ARE YOU A MEMBER OF THE U.F.O. STUDY CLUB?

Memberships to seniors, 18 and over, \$2.00 per year; juniors, 12-17, \$1.00. Available at Club meetings or by mailing dues to R. E. Kimes, Vice-President/Membership Chairman, 2207 West 79th Terrace, Kansas City 15, Missouri.

A Club membership entitles you to substantial discount on program donation for out of town speakers and ditto for initial deposit for use of the Club library (deposit returned after books returned in event of withdrawal from Club); AND your Club and program news through The SPACE VIEWER each month. This one year ONLY, however, the paid members are generously allowing The Space Viewer to be sent to ALL alike who place their names on the mailing list in order that many more people may become acquainted sooner with the Club. So you non-members who are enjoying this special privilege this year, join and share your interests with the many others in this area.

WHB LISTENERS HEARD "JERRON CRISWELL PREDICTS" ITEM ON SAUCERS

September 2nd, 9:55 and 11:55 p.m. the recorded Criswell prediction broadcast said, "I predict that a new series of sightings will convince America that there is such a thing as a 'flying saucer'. Many authorities who have been silent up to date are speaking out and letting the world know in no uncertain terms that 'flying saucers' do exist. The science fiction stories of yesterday are the facts of today."

ARE WE BEING WATCHED FROM OUTER SPACE?

The Mitchell sisters say they can do it. Helen tells that aboard the Meired she was taken to a compartment where Alma operated equipment which removed the first vibrations around her home and she saw her mother, her sister, Betty, and their children moving about.

After their stay here in Kansas City, your Editor typed a letter to Helen M., and on rereading the letter, X'd out one paragraph, reset the spacing and X'd it out again. To the naked eye, the contents of that paragraph could not be read. In her reply, Helen TOLD WHAT THE PARAGRAPH HAD SAID!, and commented on the wonder of such mechanical means.

Is our privacy being violated beyond our control? In the above instances and similar goings on reported other places, other times, the evidence would not indicate such abilities being practiced arbitrarily or indiscriminately, but rather constructively and on occasion for illustrative purposes. Hm-m-m, well, just in case it's a Jiminy Cricket "on the shoulder", check what we say to the children, oh, and what we say to Mother, too. Pray for understanding.

See you October 12:

OTIS T. CARR
